

NewMelan Body & Intimate - Usage Protocol

The NewMelan Body & Intimate treatment is designed to visibly fade skin spots within approximately 15 days. It is essential to continue the treatment even after the spots have disappeared to prevent recurrence.

Phase 1: Intensive treatment

- Apply 3 times a day (morning, afternoon, and night) for 2 weeks or until the spots disappear.
- In very sensitive areas, limit this phase to a maximum of 2 weeks.

Phase 2: Progressive reduction

- After 2 weeks or once the spots begin to fade, apply 2 times a day (morning and night) until they are completely gone.

Phase 3: Maintenance

- Once the skin is free of spots, apply once a day at night as a maintenance routine.

Important:

Do NOT use any other product on the treated areas throughout the treatment to ensure optimal results.
